### SLUMPED GLASS SPLASHBACK INFO

Escape Glass manufacture what is currently New Zealand's only toughened slumped glass. Based out of Invercargill. Hand crafted and customised designs to suit your needs.

Their one of a kind glass products have the potential to bring the extra wow factor to your home or business.

Inspiration for the hand crafted designs are drawn from New Zealand's stunning nature, sea, birds, landscape & Kiwiana culture. Each piece is bespoke and unique.

No two pieces are ever the same.

They have sample patterns but not actual moulds as they do everything by hand so they are all going to be different every time. Sample list below.

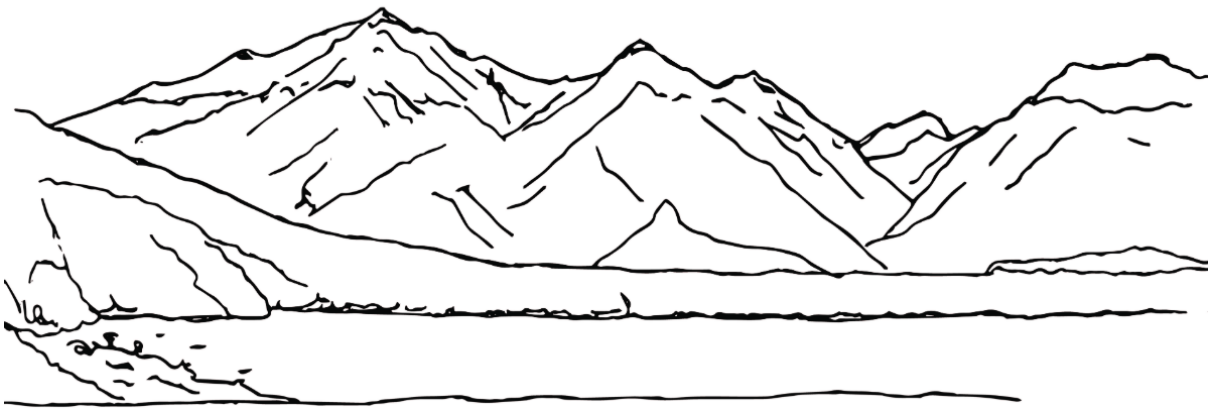

They have a design team and artist to bring images to life. They often work with a photograph supplied by a client and then turn this into a sketch and then a splashback art piece – Example below.

Colours: They can work with any colours from the Resene and Dulux colour ranges. But keep in mind that they add a metallic tint to them for all slumped glass so it will never be exactly the same as a colour chart from the store.
